

Prof. Sudhansu S. Mandal

Bio:

After completing PhD from Indian Institute of Technology Kanpur in 1996, he had been in two post-doctoral stints at Indian Institute of Science Bangalore followed by Pennsylvania State University, State College. He joined as a senior lecturer in 2002 at Indian Association for the Cultivation of Science and stayed there until 2015. He is presently a Professor at Indian Institute of Technology Kharagpur. He is currently working theoretically on fractional quantum Hall effect, disordered superconductivity, and topological structures like skyrmions in magnetic and multiferroic systems.
