

Prof. Teemu Ojanen

Bio:

He is a theorist working on quantum computer and quantum information aspects of many-body systems. He received his PhD 2008 from Helsinki University of Technology, worked as a postdoc at Freie Universität Berlin, Harvard, and Aalto University, before becoming a professor at Tampere University, Finland. Recently, he has worked on topics of topological matter, far-from-equilibrium dynamics and characterizing many-body entanglement through fluctuations.
