

# Zhipei Sun

## Short Bio:

Zhipei Sun is Professor of Photonics and the head of the Photonics Research Group at the Department of Electronics and Nanoengineering of Aalto University, Finland. He earned his PhD from Institute of Physics, Chinese Academy of Sciences. He is currently actively involved with European research council advanced grant, European quantum flagship, Academy of Finland Photonics Flagship and Academy of Finland Centre of Excellence on quantum technology. His research interests include nonlinear optics, nanophotonics, and ultrafast photonics. He mainly focuses on carbon nanotubes, graphene, and other two-dimensional layered materials for photonics and optoelectronics.
